

WPSBA External Communications Protocol

WPSBA receives requests to comment to the media on public education issues or provide representatives to present on topics related to advocacy or board governance for various external organizations. The following protocol is intended to ensure that WPSBA maintains consistent messaging on matters that are critical to our member school districts.

Within their local school communities, members of the WPSBA Board of Directors are encouraged to share their knowledge about important issues affecting WPSBA. As appropriate, Directors will be provided with relevant facts and talking points on significant topics, as well as on news, announcements, etc. to assist them in their role as directors.

Requests for comments, written materials or speakers by external organizations should be made to the WPSBA office. The Executive Director will answer requests and provide written materials or coordinate any speaker engagements on behalf of WPSBA.
