

WPSBA

Highlights of 2022-23

We focused on Improving Outcomes Together!

Goal: Encourage increased engagement of school districts in our region:

Provided enhanced professional development and networking opportunities for new and veteran school board members

- *Improving an Array of Outcomes panel - an interactive webinar with brief presentations and topic based breakout rooms hosted by panelists*
- *Community Conversations - a chance to discuss current issues with colleagues across the region*

Goal: Enhance internal and external communications

Acted as a catalyst for increased communication and information sharing among and between board members and constituent groups

- *Hot Topics in Public Ed email series - a look at top education issues for both new and veteran board members to start the school year in the know*
- *Crux of the Conversation - a recap of data collected from our districts on the topic chosen by you*

Goal: Expand opportunities to address advocacy issues

Played an active role in regional advocacy efforts directly with legislators and through the LHEC

- *New legislative districts - a breakdown of who represents each district based on redistricting provided to members*
- *Advocacy timeline - A tool to keep members informed about WPSBA's annual process and encourage participation of all districts*

All of this in addition to our regular programming, communications, data, networking opportunities, and support!
